Stability Study

Product Summary Report

Product: PREMIUM NONI

Shelf Life Supported: 36 months

Prepared for: NHT Global

FOOD PROCESSORS, INC.

Stability Report

The shelf life of a product is defined by the period of time in which the product remains acceptable to the consumer and the quality control team of the client company while ensuring the label claims on the product are met at the end of the determined shelf life. Stability testing is used to establish or confirm an expiration date for an existing product or container closure system.

Triple H Food Processors, LLC has produced Premium Noni 946 mL (32 fl. oz.) Bottle using the same processes and procedures for over 15 years without quality issues. This assures that every lot of Premium Noni 946 mL (32 fl. oz.) Bottle are produced to the same quality standard time after time. We further note that we produce Premium Noni 946 mL (32 fl. oz.) Bottle utilizing a hot fill process that helps ensure that the product quality is preserved in the bottle.

Final Summary: stability testing along with long standing, standard production processes allow the shelf life of Premium Noni 946 mL (32 fl. oz.) Bottle a 36-month shelf life. The recommended storage conditions are Store in cool, dry conditions. Keep away from direct sunlight or extreme environmental and storage conditions. Refrigerate after opening. Keep out of reach from children.

Yours Sincerely,

A handwritten signature in blue ink, appearing to read "Joe Robinson", is written over a horizontal line.
