The designation of Aflatoxin negative is defined as the average analytical result of 15 parts per billion (ppb) or less aflatoxin and applies to product distributed within the United States under 7 CFR Part 996. Results are reported as whole integers; therefore, further calculations must be rounded to the nearest whole integer for proper interpretation.

**COMMENTS:**

***NOTE: Unless otherwise noted, all samples were received in acceptable condition. Results pertain only to the samples tested.***

USDA-approved laboratory to test for total aflatoxin content in samples for domestic and imported peanuts marketed in the United States.

Reports are for the exclusive use of the applicant to whom addressed. We certify to the truth and accuracy of this report as applying to the samples tested only.
