Los Angeles, CA 90017

Dear LAACC,

Bay Materials LLC has been in business here in the Silicon Valley area since 2001 and in our present Fremont location since 2015. Our firm develops and manufactures specialty plastic materials for a wide variety of applications. We developed a thermoplastic polyurethane sheet material for use in thermoforming dental/orthodontic appliances in 2011 and we manufacture and market this material under the brand name "Zendura Dental" (www.zenduradental.com).

Today we manufacture orthodontic materials under the following brand names:

- Zendura®
- Zendura® A
- Zendura FLX®
- Zendura® TRAK
- Zendura® VIVA

Bay Materials produces these thermoformable sheet materials exclusively in our production facility in Fremont, California and ships them to clinicians, dental labs and orthodontic appliance manufacturing companies worldwide. For roll formats, our products are manufactured only in the US. In the USA and many other countries, these plastic sheet materials are considered raw materials or production components and are not regulated as medical devices.

Thank you!

Sincerely,

Dr. Mayuri Kerr
DDS, MS
Director, Clinical & Regulatory Affairs
